Professional Summary

Gen AI Engineer & Data Scientist with 4 years of experience architecting scalable AI solutions on Microsoft Azure and OCI. Specialized in building Agentic Workflows, RAG pipelines, and Multi-Agent Systems using LangGraph, MCP, and LLMs.

Skills

- **Generative AI:** Agentic Workflows, RAG, LangChain, LangGraph, Model Context Protocol (MCP), Azure OpenAI, Bland AI (Voice), Chroma DB, LangSmith, Arize AI.
 - **Machine Learning:** LightGBM, TensorFlow, PyTorch, Scikit-learn, Computer Vision (Faster R-CNN), Forecasting (Prophet), LambdaMART.
 - **Cloud & MLOps:** Azure (ML Studio, AKS, MS Foundry), Docker, OCI, Git, SQL, PySpark.
-

Work Experience

Aspire Systems

Sr Engineer – Gen AI

Bengaluru | 06/2025 – Present

- Architected a multi-agent Scope-of-Work generation engine using LangGraph, orchestrating specialized end-to-end automated document creation. Integrated Model Context Protocol (MCP) to enable seamless tool-to-LLM data exchange across the agentic workflow, standardizing how downstream business systems plug into the LLM layer.
- Embedded Bland AI to power real-time, voice-triggered Gen AI workflows for client-facing PoCs, expanding the practice's input modality beyond text. Drive end-to-end design, evaluation, and deployment of Gen AI proof-of-concepts; partner with client stakeholders to translate business problems into agentic AI solutions.
- Architected and implemented evaluation framework for a multi agent system using the traces on Arize platform.

Tata Consultancy Services

System Engineer

Bengaluru | 08/2023 – 01/2025

- **Enterprise RAG Chatbots:** Developed two GenAI RAG bots -Support & HR using Azure OpenAI and Chroma DB. Deployed vector stores on AKS via Docker, achieving a 40% reduction in ticket resolution time and a 60% decrease in manual policy queries.
- **Tariff Plan Recommender:** Engineered a hybrid recommender system using LightGBM for churn prediction and LambdaMART for plan ranking. Integrated a GenAI layer to generate personalized, human-readable explanations of plans, contributing to a 7% reduction in customer churn.

Assistant System Engineer

Bengaluru | 08/2021 - 07/2023

- **Predictive Sales Dashboard:** Delivered a 90-day demand forecasting model using Facebook Prophet and customer segmentation via K-Means. Visualized insights on Power BI, enabling leadership to shift from reactive to proactive inventory planning.
 - **Next Best Action Engine:** Developed a User-Based Collaborative Filtering system using Scikit-learn to unify product offers across partner and D2C channels. Deployed as a real-time REST API on Azure ML, optimizing for Precision@K metrics.
-

Education

- [M.Sc. in Data Science](#) | Manipal Academy of Higher Education(Online) | 2022 – 2024 | **CGPA: 9.00/10**
 - [B.E. in ECE](#) | APS College of Engineering | 2017 – 2021 | **CGPA: 7.23/10**
-

Awards and Certifications

- Star of the Month Award for resolving critical defects | Special Initiative Award for dedication in delivery.
- [Microsoft Certified: Azure AI Fundamentals AI-900](#)
- Oracle Cloud Infrastructure 2025 Certified [Gen AI](#) and [Data Science](#) Professional.
- [Deep Learning Specialization](#) and [TensorFlow Developer Professional Certificate](#) on Coursera.
